1 December 1977

MEMORANDUM FOR: Director, ODP

STATINTL FROM   : ███████████████

Acting Deputy Director for Processing

SUBJECT   : Processing Weekly Report

Tasks Accomplished

    1.   Version 4.1 of Fast Dump Restore has been installed
on the CAMS systems in both the Special Center and the ████NTL
Center. Considerable testing has been conducted by SPD to
ensure reliability of this version. No problems were found
during testing and, as a result, the use of IEHDASDR to back
up CAMS has been discontinued. ██████████ STATINTL

STATINTL   2.   A summary of outstanding RAMIS problems has been sent
to ██████████ for review and action. ██████████   STATINTL

    3.   The CAMS data base was reallocated and redistributed
during the weekend of 26-27 November. The redistribution should
reduce disk arm contention. However, it has been noticed that
while online responses are better there is a noticeably slower
turnaround of batch jobs. The CAMS system was in a read-only
mode for 20 hours and unavailable for an additional 30 hours
STATINTL while the reallocation and redistribution was accomplished.
██████████████████████████

    4.   All final Directorate Congressional Budget reports
(except for the DDO) were completed and ready for Xeroxing by
0800 28 November. The final reports for the DDO will be   STATINTL
completed by 2 December. ██████████

    5.   Sixteen programs have been converted from EAM processing
to the 370/20 using RPG programming. This conversion has signi-
ficantly decreased required production time and improved reports
distribution to users. ██████████   STATINTL

    6.   Processing of the CFC data has been accomplished through
day 23 of the 1977 campaign. All data is expected to be received
and processed within the next two weeks. ██████████   STATINTL

7.   The Office of Finance sent a memorandum to ODP commending the following people for their contribution to the year-end GAS processing: ▮▮▮▮▮▮▮▮▮▮▮ STATINTL

STATINTL ▮▮▮▮▮▮▮▮▮▮▮▮▮▮▮▮▮▮▮▮▮

8.   There were seventeen new users added to the VM system during the past week. There are now 2,158 VM system
STATINTL users. ▮▮▮▮▮▮

Problems

STATINTL
STATINTL
Hardware problems are still being encountered with the PDP-11/45. ▮▮▮▮ is attempting to resolve these problems.

▮▮▮▮▮▮▮▮

▮▮▮▮▮▮▮▮▮▮▮▮▮▮▮▮▮▮▮▮▮▮ STATINTL

Addendum

STATINTL
On 30 November and 1 December we experienced problems on both the primary and the backup PDP computers which support MAD processing. The OCR COLTS and OLTA systems capability were deleteriously impacted by these problems. ▮▮▮▮ engineers are now devoting increased time and attention to our problems.
